THE BEST EMPLOYERS

in the apprenticeship world.

NHS Careers Events

Dates: Saturday 13 July 2024 & Saturday 12 October 2024

Venue: [Huddersfield Royal Infirmary, Learning Centre, Sub Basement](#)

- Attendees will be able to access support in applying for roles
- Gain interview skills and knowledge
- Learn about CHFT and our values
- Access support from our community partners
- Meet service and department leads
- Learn about our clinical and non clinical roles
- Maybe even secure an employment offer!

Join our One Culture of Care workforce and view our roles at: <http://jobs.cht.nhs.uk/>
email: ask.recruitment@cht.nhs.uk

24 Hours at York St John

Stay overnight at the university on Wednesday 17 July 2024 and discover more about student life at York St John.

[Apply for your place](#)

Join us on our historic campus to experience university life first-hand. Our 24 Hours at York St John event is for Year 12s interested in applying for university.

As part of the event, you will stay over for 1 night in student accommodation to get a feel for life as a student. During the days, you will take part in subject taster sessions to explore your course options for university. You will also have time to explore the beautiful city of York.

This event is free. We will cover the costs of your travel and food. We recommend that you bring a small amount of spending money.

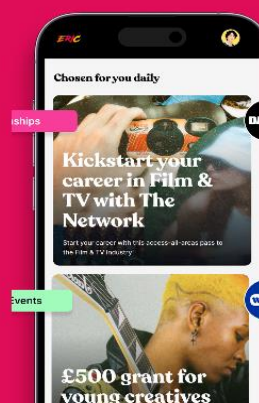

Get yourself ready for the world of work in the creative industries.

CAREER OF THE MONTH

Clinical Scientist, Medical Physics

<https://www.prospects.ac.uk/job-profiles/clinical-scientist-medical-physics>

Average salary (per annum) £32,000 – £100,000 depending on experience

Typical hours (per week): 38-40 This could include on call work

What does the role involve?

You could be involved in developing, commissioning, testing, operating and maintaining specialist equipment to prevent, diagnose and treat a wide range of health conditions. You will work closely with medical professionals to provide outstanding healthcare for patients and a safe working environment for healthcare staff.

Some ideas of what you will be doing in this role?

- Working with medical staff in areas such as radiotherapy, ultrasound, nuclear medicine, laser technology and physiological monitoring.
- Informing patients of the possible implications of their treatments
- Supporting clinical trials
- Developing new techniques in X-ray, MRI, laser, ultrasound and ultraviolet technologies
- Overseeing quality control of equipment
- Train and advise medical staff on new equipment and protocols
- Develop policies for operating equipment
- Auditing hospitals for compliance with health and safety legislation

Areas of specialism

Diagnostic radiography
Radiotherapy physics
Nuclear medicine

Radiation safety/protection
Magnetic resonance imaging
Ultrasound and non-ionising radiation

Employers:

Private hospitals
Nuclear medicine companies
Universities and research organisations

Medical equipment manufacturers
Regulatory authorities
Research laboratories
Health & Safety

What to do to get into this career:

- You will need either a first or a 2:1 undergraduate degree in a subject that contains a high level of physics.
- Evidence of research experience and a relevant Masters or PhD is also desirable.
- Training to become a clinical scientist working in medical physics is done via the [NHS Scientist Training Programme](#)

For more information: [Institute of Physics and Engineering in Medicine](#)
